AUTOMATIC TEST EQUIPMENT

Danfoss select Terotest to supply ATE for high volume testing

Following a visit to the Nepcon show held in Birmingham last May, Danfoss - Randall selected TEROTEST to supply them with number of testers to be installed at their factory in Bedford.

The installation now consists of three CIMTEK ATE systems together with specialised pneumatic fixtures incorporating cameras. The systems are used for In-Circuit and functional testing of the Danfoss range of heating control units.

“Since installing these systems we have been able to increase our throughput by 20%” says Claus Hjerrild, Operations Director at Danfoss.

New specialist joins the team

TEROTEST is pleased to welcome Simon Strophair to the team. With the increasing amount of applications work required by existing and new customers, TEROTEST has decided to increase its capability to offer bespoke solutions to the market. It is increasingly important for end users to have a system “up and running” from day one.

Simon has 15 years experience in the ATE industry and has previously worked at Wayne Kerr and more recently Cimtek.

If you thought you couldn't test it.....talk to us!
