## MTS100 Multifunction Test System

MTS100 is an innovative test system designed to automate the testing of your products - whatever technologies they contain, thereby improving both quality and throughput.

MTS100 can be used at any point in the test process and can be easily enhanced to test your future products.

Our proven track record of supplying successful ATE installations for over 24 years to customers such as BAE, Siemens, GEC, MoD, NATO and sub contract manufacturers, covers a wide spectrum of products.

### MTS100 tests:

- Printed Circuit Boards
- Electronic Modules and sub assemblies
- LRU's (Line Replaceable Units)
- Final Products

### Technologies covered by MTS100:

- Electronic: Analogue, Digital and Hybrid
- Electromechanical systems and actuators
- Video/Optical e.g. digital readouts
- Acoustic
- Hydraulic
- Pneumatic (including air leakage)
- Any product with a mix of the above

### Typical MTS100 applications include:

- Radar systems
- Missile systems
- Communication equipment
- Civil and Military Aeronautics
- Medical Systems
- Computer Peripherals
- Marine
- Automotive Systems
- Smart Water and Electricity meters
- Railway safety equipment
- Safety Critical Systems

### Terotest supply a complete test solution

If your product needs levers pulled, buttons pushed, displays read, knobs turned or switches switched, MTS100 from Terotest will meet your test needs.
